LOCAL NEWS ITEMS

Hotel Royal, near C. P. R. station, on
main street, Vulcan. Rates 50c., 75c., \$1.
Any persons desirous of picking red
currants, on shares, phone 1804, Vulcan.
Just as the paper is going to press on
Friday noon, President Spooner phones
to Secretary Flood that another strike in
Vulcan No. 2, in Turner Valley, has in-
creased the flow of wet gas to five million
feet per day.
St. Althelm's Church, Sunday, July
31st. Holy communion and sermon 11
a. m. and evening 7:30 p. m. There
will be service at Union Jack school at
3:30 p. m., conducted by Revs. Herbert
and Arnold Clay.

Vulcan was largely represented at the
picnic at Lake McGregor on Wednesday
and those in attendance came back with
the report of a great time and an in-
timidating success, and Secretary Alex.
McIntyre vouches for the largest attendance
in the history of this annual event.

Preparations are under way for the
Vulcan Cadets to go into camp. The
boys are just now concerned about a cook
and transport facilities, but these matters
will likely be readily straightened out
so that the troops will be on the move
the early part of next week. The camp
is beautifully situated on the river bank
west of High River, and twenty-five to
thirty-five Vulcan lads are anticipating a
whale of a time.

Plans are maturing for the running of
the Calgary Power Company line into the
Lee Smith coal mine, south and east of
Vulcan, the purpose being to secure
light and power for this industry. The
proposition includes the installation of
mining machinery that will greatly in-
crease the output of the mine, and in-
cidentally cheapen the product to the con-
sumer. The mine is a mile and a half
from the trunk line, necessitating a
branch line to cover that distance.

Miss Katie Colwell called recently at
The Advocate office to say just how sat-
isfied and pleased she was with the short
course at the School of Agriculture in
Clareholm, when as a scholarship in con-
nection with the Vulcan and district
school fair. The instruction was useful
and valuable and the entertainment was
exceedingly enjoyable. This testimony
and that of many others who have been
to the school should be an incentive to
the boys and girls who exhibit at the
fair to make a try for the scholarship.

Here is some pleasing news. Vulcan
Citizens' Band has decided to put on a
series of weekly band concerts. These
will be held in the skating arena, and
regularly on Thursdays nights, commencing
on August 11th. This is a fine idea,
affording the folks splendid music for a
promenade, providing a pleasing accom-
paniment to an hour of leisure, and offer-
ing an opportunity for the delights of
community visiting. No regular charge
will be made but there will be a chance
to express appreciation. It is up to the
people to popularize these events, and
surely they will do it.

The municipal hospital proposition is
progressing splendidly. The appoint-
ment of the provisional board of man-
agement has been made by the govern-
ment department according to the pro-
visions of the law relating to hospitals.
This board will meet in Vulcan at an
early date, following which it can be ex-
pected that hospital activities will be
speeded up and be more apparent locally,
the centre of operations now being trans-
ferred from the seat of government to
the hospital district. There will be some-
thing doing all the time from now on
until the matter is settled by a vote of
the people, and there is a clear indica-
tion that the ballot will be decisively
favorable. Stettler and the surrounding
territory are just now in the midst of a
hospital campaign such as now obtains
in Vulcan territory, and it would be a
commendable ambition for this district to
finish ahead of the folks up north.

LOCAL NEWS ITEMS

The garter has just found its place
in the sun after nineteen centuries of
obscurity.

The Times, reporting the Elks' pic-
nic at High River last week, says:
"The Vulcan brass band was generous
in its band selections."

While a Scotchman was looking for
a lost ball on the Calgary municipal
golf links last Thursday, some thief
stole his bag and set of golf clubs.

Just keep it in mind that you will
have opportunity to financially sup-
port the Red Cross society. The idea
is to get a little each from everybody.

The painting of the two premises
owned by Mr. Pete Beardsley, occu-
pied by Mr. McMillan and himself,
will add his name to the local improve-
ment honor roll, and will give de-
cided improvement to the residences.

The new District Deputy of District
No. 2, Order of Elks, in which Vulcan
is included, is Mr. Alex. Allen, of
Stavely. Alex. has been a most effec-
tive and active officer in the Stavely
lodge and is well known as a real bill
and a ball player, and will be hailed
as the chief Elk of the district.

Nanton ratepayers will shortly vote
on a \$10,000 by-law for the erection
of a skating rink. This is interesting
even at Vulcan, for with a covered
rink Nanton is likely to request the
admission of a hockey team in the
Wheatbelt league, and the folks are
expecting that Vulcan will figure
somewhat prominently in this league
this winter.

Shippers desire that the paper
voice their complaint as to the very
unsatisfactory condition of the stock
yards at the C.P.R. The corrals are
new and good, but the new site is on
low and exceeding wet ground, and
the recent loading experiences of lo-
cal shippers has certainly put them
on the prod. Surely this matter will
be righted, for there is general im-
provement along the tracks just now
at Vulcan.

Notwithstanding the severity of the
recent electrical storms, the Calgary
Power Co., gave continuous electrical
service. It was unfortunate that
Nanton was without service owing to
a cable being burned out in the cal-
gary sub-station. As an indication of
the severity of the storm, two trans-
formers were completely lost at
Stavely and one at Parkland. These
repairs were rapidly made in a tem-
porary manner and were placed into
permanent shape yesterday. This
was the worst storm experienced in
Western Canada and will probably
not be duplicated in many years.

Intimation was received in Vulcan
on Wednesday that the first draw had
been made in the Bennett Cup foot-
ball competition, and that Vulcan had
been drawn to play the winners of
the game between the Callies of Cal-
gary and Edmonton, and that Vulcan
will be a visiting team in their first
game in the play-down. Should this
be definite, it will be somewhat disap-
pointing to local fans. However, it is
but one of the fortunes of sport, and
not unfair at that, and the boys are
game in any event, and will make
their best effort under whatever cir-
cumstances. They are fit and keen,
and are anticipating the battle with a
confidence that is much a factor in
winning games. May they have the
success that all so much desire.

The building long known as the
Canada Cafe is now the D. C. Jones
drug store, and the former drug store
is now the cafe. The switch has been
made this week. Both places will be
altered to suit requirements and the
change will be made the opportunity
for the considerable improvement of
both. Mr. Jones has for some time
been the owner of the premises into
which he has just moved his drug
and stationery stock and workmen are
now employed on alterations and de-
corations both inside and out that will
entirely change the appearance of the
place. There will be an entire glass
front on the main street and a large
window on the side street, and a cor-
ner entrance. Paint will be added to
finish a splendid job of improvement,
and certainly this corner will look
quite different.

LOCAL NEWS ITEMS

Just because there's no light in
your girl's parlor is no sign she's not
at home.

Workmen have renewed operations
on the new residence being built for
Mr. Gus Spaeth on a site opposite the
park.

The basketball girls, with a record
of no losses this season, find it diffi-
cult to secure games. They are con-
tinually making the effort.

Rev. J. W. Jenkins will preach on
Sunday, July 31st, at Kirkcaldy at 12
o'clock and in the Odd Fellows' hall
at Vulcan at 7:30 p. m. Everybody in-
vited to the services.

entry from Vulcan in either.

Vulcan certainly furnished its quo-
ta of the big attendance at the base-
ball game at Stavely on Sunday af-
ternoon, and it was all right with the
fans from here when Stavely won.

The installation of a large new elec-
tric fan on Tuesday at the Pettman

Mr. George M. Burbach, advertis-
ing manager of The St. Louis Post,
says: That advertising "pulls." It
does not "jerk" and the most success-
ful advertisers are those who keep
everlastingly at it—advertising in the
so-called dull season to make business
good and in the busy season to make
business better.

Mr. J. N. Dwiggins made a recent
trip to Washington to accompany
Mrs. Dwiggins on the return home af-
ter many months spent in the States.
With the party on the auto journey
back were Mr. and Mrs. G. J. Fisher
and Mrs. M. Whiteman, all of Tacoma
Washington, who are now guests at
the Dwiggins home near Ensign.

It has been decided that during the
holiday period is not the best time for
the Elks' "Kiddies Day," so many of
the boys and girls being away, and as
it is the desire that as many as pos-
sible may enjoy the fun, it has been
concluded to postpone the event. The
Elks' will "do their stuff" for the en-
tertainment of the boys and girls on
the date of the annual school fair,
surely an opportune time, for surely
all the young folks from everywhere
will be in Vulcan on that occasion.

This, added to the proposed changes
in connection with the fair this year,
will make a combination delightful to
every school pupil, as well as the
younger kiddies who are not yet at-
tending school. Details will be work-
ed out in the meantime.

The induction of Rev. A. Ranné in-
to the pastorate of Chalmers United
Church, High River, on July 13th was
conducted by Rev. F. W. Locke, chair-
man of High River Presbytery assist-
ed by Rev. J. N. Brunton of Vulcan,
before a large gathering of the con-
gregation and friends. Rev. Mr.
Locke gave the address to the minis-
ter and Rev. Brunton addressed the
congregation. The chairman of the
Board, Mr. George Young and the
Clerk of the Session, Mr. George
Mack, assisted in the interesting cere-
mony by extending to the new pastor,
the right hand of fellowship. Rev.
Ranné comes to his new charge very
highly recommended and with a spe-
cial record of faithful services of 14
or 15 years in Bankview United
Church, Calgary.

Imagine Mrs. Dyce Allen, who is
visiting in Nova Scotia, reading the
following item which appeared in a
Halifax daily under the flare head
"Not One Building Escaped," and
which is evidence of the fact that the
rather a story goes to the greater its
size: "A survey of damage caused
by the tornado that swept this thriving
little town Friday has brought
residents of the district to a realization
of the force that struck at their
homes, yet passed without exacting a
single casualty. Today the town pre-
sents a scene of desolation, houses
in ruins, debris strewn all over the
countryside, uprooted trees are
piled on highways and grain fields are
levelled. Not a building in the town
escaped. Telegraph and telephone
poles were blown down over an ex-
tended area. Heavy rain followed the
blow and hail fell in some outlying
sections."

The Girls' Athletic Club enjoyed a
hike to the banks of the Highwood
River, west of Captain Collis' subur-
ban home, on Monday evening last
where they partook of a picnic lunch-
eon. As their guest of honor, they
had Mr. M. E. McGregor, former
principal of the Public Schools with
them and after luncheon, Miss Ruth
Sexsmith, president of the club, made
the presentation of a beautiful green
gold signet ring to Mr. McGregor in
appreciation of his unselfish efforts in
training them along athletic lines.
The members of the club expressed
regret at Mr. McGregor's departure
from High River and wished him the
best of good luck in his new position
as principal of Vulcan Schools. Mr.
McGregor in reply acknowledged his
deep appreciation of the beautiful gift
and expressed his regret at leaving
High River. Singing glee songs was
enjoyed for a time after which the
return journey was made in happy
mood.—High River Times

LOCAL NEWS ITEMS

Monday next is the day of the reg-
ular meeting of Vulcan town council.

Truthful advertising is not bait; it
tells you of articles of real value for
your money.

Mrs. Gordon, of Carbon, was a re-
cent visitor in Vulcan, the guest of
her sister, Mrs. John Dewie.

The Advocate intends in the near
future to run a series of community
booster pages to which local business
people will be expected to contribute.

The little girl had done unusually
good work in the second grade and
was promoted to the third. Upon
meeting her teacher, whom she loved
dearly, her first words were: "I wish
you knew enough to teach me next
year."

The Vulcan Citizens' Band will
play an engagement at the Lomond
exhibition on Tuesday, August 2nd.
The same week they will also fill an
engagement at Queenstown. Both of
these places are going to get some
good music.

The old swinnin' hole out at the
Little Bow made a great appeal to
Vulcan citizens on Sunday last. It
is said that there were so many out
there that they were required to take
turns in going in. If we only had a
pool right in town.

It would appear to be the conclu-
sion that the curling rink, which was
destroyed by the cyclone, will be re-
built, and right away. So far as is
known it will be required first in con-
nection with the school fair, and the
curlers always help the fair.

The fact that Claresholm hall team
has won the Brewery Cup, the cham-
pionship trophy held for three years
by Fernie, will increase the regret
that this team was unable on account
of bad weather to make its appear-
ance in Vulcan on Dominion Day.

There was a baseball game played
at Blackie on Sunday last between
Blackie and Nanton. The score of 18
to 19 in favor of Nanton would indi-
cate a run-away game. The umpire
had his work cut-out and while he
was impartial, yet his decisions
aroused wrath on the part of some
spectators.

Local dancers are pleased with the
information that Len Davis
and his orchestra will return to Vul-
can about the first of August, follow-
ing their summer engagement at Gull
Lake pavilion. Miss Kitty Purdy,
who is a student on the sax, has gone
up to the lake to take instructions on
the instrument and play with the or-
ganization.

Electric motors lately delivered on
the sites of the two new elevators
now under construction at Vulcan
would indicate that electricity is to be
the power used in connection with
these institutions, and it is a fact that
motors are also to be installed at sev-
eral of the other elevators. The Cal-
gary Power Company plan to run a
pole line along elevator row.

Every effort is being made by the
management of the Calgary Power Co.
to complete their main line before
starting on rural service. The line of
poles is within two miles of Vulcan
and the stringing of wire will com-
mence from Blackie shortly. The
company expect to give service to
Brant, Ensign and Vulcan early in
August.

The past week provided weather
just what was wanted for the grow-
ing crops. Hot, bright sunshine and
dry has been the rule and, in conse-
quence remarkable advancements were
noticed with now about 90% of
wheat headed out. Some beautiful
crops, heavy with exceptionally large
heads, are to be seen in all directions
from the town with no results of de-
struction.

The farms to the north of Vulcan
are surely producing curios. The re-
port in The Advocate last week of the
findings of Mr. John Love, has been
followed by a contribution this week
by Mr. Robert Love, who had left at
the printing office a spear head and
an old-time pistol. The spear-head
is of steel, about ten inches in length,
and was but recently plowed up in a
field that has been cultivated for
many years. The pistol, which is a
muzzle-loader and fired with a cap ar-
rangement, was unearthed in a street exca-
vation in the city of Ottawa many years ago,
and the very style of the thing is
proof of its antiquity. Mr. Ben Gram
informs the paper man that on only
last week there was plowed up on his
place a steel arrowhead, and that
years ago he picked up a savage-look-
ing knife that was perhaps used in
buffalo butchering by the aborigines.
These articles will be added to the col-
lection on view in the Discher jewelry
store.

The latest directory of the Alberta
Government Telephones has just been
issued to local subscribers, and a
count will disclose the fact that at
the Vulcan exchange there are oper-
ated 184 town phones and 408 on the
rural lines. These numbers show an
increase at this point and total the
greatest number up to the present at
the Vulcan exchange, which is one of
the largest on the system outside of
the cities. The exchange is under the
management of Mr. Roy Greene, and
the lineman is Mr. Win. Scott; the
operating staff is supervised by Miss
Nellie Brazier, and consists of Misses
Gladys Daines, Florence Loisel, Win-
ona Tuttle, Lucille Sevens, and at
this vacation season, when in turn the
operators are given a merited holiday
Miss Flora Newton is giving relieving
service. The staff renders an excel-
lent and courteous service unexcel-
led anywhere, and as busy as they
constantly are with the volume of
business handled, they all contribute
their part in making the office quar-
ters and the grounds surrounding one
of the beauty spots of the town. Re-
cent changes and improvements,
which have lately received mention,
with the features here stated, make
the Vulcan exchange one of the tar-
gest and best and prettiest in the prov-
ince.

LOCAL NEWS ITEMS

to the Peace River country, and re-
turns with a fine impression of that
portion of the province, but he has
not said that he intends going up
there to locate.

Friends of the Rev. G. Biddle of

he is taking the services at Waterton
Lakes on July 31st. He hopes to be
accompanied by Bishop Capers, of
Texas, who will preach the sermon.—
Pincher Creek Echo.

Saturday and Sunday were perhaps
the hottest days thus far this sum-
mer at Vulcan, one report giving the
temperature registration at about
ninety. These are the days that make
the people wish for the swimming
pool that we haven't got.

The lot in the rear of the opera
house, across the lane from the hotel,
has been purchased by the Vulcan
Light and Power Co., and there will
be erected thereon a substantial build-
ing to serve as an office for the firm
and salesroom for electric fixtures and
supplies.

Under the auspices of the Good
Deeds Women's Institute, Miss Knox
of the Women's Home Bureau Ser-
vice, Department of Agriculture, will
conduct a basketry demonstration,
August 5 to 8, at Richmond Hill
school. All ladies who may desire to
do so are invited to attend.

There have been hail storms that
have cut wide swaths of destruction
through some sections, and there will
probably be other troubles before the
crop is harvested, but as The Leth-
bridge Herald says, these will only
take a small part of the huge total
crop that is now in sight.

The local authorities threaten ac-
tion in the matter of the delivery by
citizens and others of rubbish to the
nuisance grounds. Too much of the
refuse is allowed to scatter along the
way to the ground, and it is reported
that some loads are even dumped out-
side the enclosure. This kind of
thing will not be permitted.

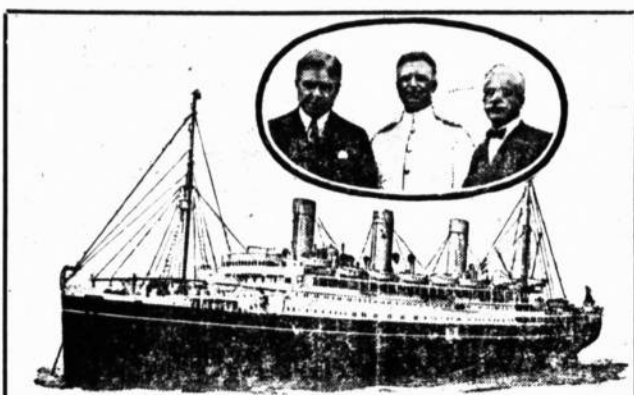

The Vets dance on Friday night
last was a very enjoyable and success-
ful event. The attendance was large,
the music and everything good, and
incidentally a few dollars will be ad-
ded to the memorial building fund.
The affair took place in the Old Fel-
lows' hall, and the music was furnis-
hed by the Ladies' Mandarin Orches-
tra of Calgary.

The progress of the line construc-
tion by the Calgary Power Company
is indicated by the distribution of
poles along the survey through the
town of Vulcan, the coming and go-
ing of crews of men for the different
branches of the work, and the location
here of the business headquarters of
the construction firm. We will soon
have hydro in the reasonable con-
sumption.

The Claresholm Press, referring to
the basal situation regarding the
league in which that town is repre-
sented, makes an observation that will
be of interest locally: "The expe-
rience this year in the league has pro-
ven that Calgary is a milestone on the
necks of the country members of the
league. Next year the prospects are
that Nanton, Vulcan and Macleod will
enter the league, and if such is the
case there will be a friendly follow-
ing of supporters following the vari-
ous teams throughout the schedule."

Reports from the Turner Valley oil
fields do not now excite Vulcan people
but if they are favorable, they create
rather a quiet and firm satisfaction,
for the faith has been established in
the success of the ventures in which
local people are mainly interested. So
it was recently when the report came
of an immense flow of gas at Vulcan
No. 2, and later when there was a
proved production of crude oil, and
the report on Wednesday gave the
amount of crude taken on Monday at
twenty barrels. This is taken only as
an indication, and the drilling pro-
ceeds. Spooner No. 1 has had simi-
lar results, the difference being that
the strike of crude is less. Every-
thing is looking fine and going well.

Sunday to Sunday last was the va-
cation period taken by Mr. Roy Ful-
ton, and during the time he made an
auto trip to Alaska, Sack, where he
made a marriage alliance with Miss
Ethel MacRae, the daughter of Mr.
and Mrs. Dan. MacRae, of Craigsland.
The marriage took place at the manse
in the town first named where the
bride had been a guest at a commu-
nity shower, and the good wishes of
many friends were attested by the
contribution of valuable gifts, to
which have been added the presents of
friends in this interesting event are
well known in Vulcan, the groom be-
ing a member of the family of Mr.
and Mrs. John Fulton, and the bride
recently completed a residence of
three years in this town and district,
residing a portion of the time with
her aunt, Mrs. Ben Graham. The re-
turn, was made by auto to Vulcan
where a new home will be established
in the splendid residence which has
for some time been the property of
Mr. Fulton, and with them into the
new home will go the best wishes of
a host of friends.

BIG MEN ON A BIG SHIP

R. W. Beatty, Chairman of Canadian Pacific Steamships, Ltd., Commander R. G. Latta, of the Empress of Australia, and W. R. MacInnes, Vice-President, C. P. R., in charge of traffic, on board the Empress of Australia on her arrival at Quebec, following her first trip on her changed run across the Atlantic.

VULCAN ADVOCATE
VULCAN, ALBERTA

NO CAUSE FOR WORRY

There is always more or less worry connected with money. Those of us who do not have it worry about getting it, and those of us who have it are often put to a great deal of worry in hanging on to it. In addition to this no little worry is brought on by the desire to make a jiffy grow where only a penny grew before. It seems as though poets and philosophers have conspired to bring money into disrepute, so anxious are they to tell us that the mere possession of it is a great burden. In more recent times there has come to us the warning that money carries germs. Learned experts even went so far as to demonstrate that a bank clerk's occupation was particularly hazardous because he handles so much money. But now this dread has been dispelled. After exhaustive investigation on the subject of money as germ carries two Illinois University experts assure us that this danger has been greatly exaggerated. It seems that the metals from which coins are made act as destroyers of bacteria. This relieves us of the worry connected with the handling of money. The next thing for some expert to do is to tell us how we may be relieved of our worries in trying to get hold of it.

BALDWIN HAS RIGHT IDEA

Len Nesbitt former editor of the Bassano Mail now in charge of the publicity branch of the Alberta Wheat Pool, has evidently been in communication with Premier Baldwin of Great Britain who has caught the psychology of the Western Wheat Pool, when he declared the farmers here had helped themselves. He gave this advice to the farmers of the old country who have been protesting strenuously against conditions there: "All this has been done by the farmers themselves. Confronted by the slump following the post-war boom they consulted together and formed a pool of the great wheat producing provinces, and this pool is governed by the farmers themselves. That gigantic effort, by self-help and keen work, saved thousands of Canadians from disaster. The problems of the farmers here at home are less in magnitude but much more complicated in detail and I should like to see them faced with the same kind of organization and co-operative business ability as that which your brothers in Canada tackled their problems."

The editor of the Lethbridge Herald commenting on the above says: "Whether you are for the wheat pools or against them or whether you are neutral on the matter, the fact remains that the farmers of Western Canada have wiped out much of the old discontent by taking hold of the business of selling their own grain. They feel that the price they are now getting is the price they are entitled to receive. There is no doubt that this is at the bottom of the satisfaction generally expressed with regard to the wheat co-operative marketing organizations. Premier Baldwin has caught the right note."

Under the able direction of the C. P. R. the Canadian Colonization association report they have placed this year over 400 families and more than 800 families have been temporarily placed and are coming from Europe. It is figured out that these settlers this year will raise crops valued at \$6,000,000. Western Canada will progress and prosper with a well directed immigration policy in force.

The "Irish Navy" has been sold for \$100. The submarine constructed by John P. Holland 40 years ago for Fenian supporters who hoped to use it against the British fleet, was knocked down for that sum to a junk man in New York.

A Brantford nurse, Miss Ethel Sears, is reported to have renounced a million dollar bequest by the late Col. Aldrich of New York, in favor of Col. Aldrich's mother. This is an unusual incident nowadays we give it space in this column.

Premier John Oliver of B.C. who is suffering from cancer and who offered his resignation to the Liberal party, will remain premier for a time. John Oliver although a sick man is a great asset to his party.

This from the Chicago News reads well: "No nation ever had a better neighbor than Canada has been to the United States." Thanks very much!

They are now calling Col. Lindberg the minister without portfolio and he is the best of them all.

VISIT OF PREMIER BALDWIN

With the coming to Canada of Premier Baldwin, prime minister of Great Britain, a Quebec paper expresses the following thought: "Let us as the hosts of Mr. Baldwin, work all we know to let him see the wonders of Canada and the people without being obliged to make speeches every time the train stops." Doing this, it says, will be a policy of considerate courtesy for which the great English statesman, it is sure, will be profoundly grateful and the one most likely to inspire him with a desire to repeat this his initial visit. Personally, we think Premier Baldwin should have consideration along these lines, but at the same time we don't think he would object to one speech a day; for he will have something to say well worth the hearing. The Quebec paper continues, that the visit of the British premier has a profound historic significance, for it will be the first time that a British Prime Minister while in office, has enjoyed Canadian hospitality or for the matter of that, the hospitality of any overseas Dominion as far as it knows. It publishes a communication from a distinguished correspondent in London about his visit. He writes:

"The Prime Minister is looking forward tremendously to his visit to Canada though, if I know anything at all about Canadian hospitality, it strikes me he is going to have a pretty busy time. He is a much overworked man. You will find him perfectly delightful; indeed I think he exactly suits the times. I think the people over here are rather tired of brilliant men to govern the country. What they really want, and what we have got, is a great gentleman with a great sense of duty, who has no axe to grind, with the result that everybody trusts him. I wish I was going to Canada with him though, perhaps, it is just as well I am not, for if I were I should work all I know to let him see the wonders of Canada and the people, without being obliged to make speeches every time the train stops."

WHEN YOU DRAW YOUR WILL

The Orillia Packet in recent issue makes reference to the bequest of \$5,000 by a former Orillian, the late Robert Begg, of New York, for a memorial fountain. Here in Alberta one rarely hears of bequests of this nature being made by those who have accumulated a fortune and the wonder to us is that more people have not given it a thought when drawing out their wills before they shuffle off this mortal coil. What better monument to the memory of man or woman than a memorial of some kind, let it be a swimming pool, memorial fountain, improvement of the park, soldier's monument, or a fund to provide for the relief of those in distress in the community in which they lived and made their money.

The editor of the Whitty Gazette, in a recent issue points out the need for the adoption of one of two verses as the official version of "O Canada." There are so many versions that when "O Canada" is struck up nearly all sing it to different words and many do not know more than a few lines. Someone in authority must give us the words of one verse so that may stick to that with the knowledge that we are right and sing it as lustily as we do the national anthem or "Scots Wa Ha." The tune is magnificent and inspiring, but the demand is for words that we can swear by and not at.

"If you don't tell 'em, you can't sell 'em." That was the advice of the National Retail Grocers' Association last week by Fred W. Anderson, whose merchandise store at Cozad, Nebraska, a town of 1,200 does an annual business of \$300,000. "Every grocery man should spend at least 2 per cent. of his gross receipts during 1927 for advertising," he said. "It is so powerful that it can change my breakfast, my automobile or my place of living." Mr. Anderson said the success of his business dependent entirely upon carefully planned advertising campaigns.

Henry Ford knows his onions all right. According to word received Henry Ford will send a special sport Phaeton model Lincoln car to High River for the use of the Prince of Wales during his forthcoming visit to High River. The car is being shipped from Detroit to High River and will be available for the Prince upon his arrival.

How many staunch Canadians can name the Fathers of Confederation or even the premiers since the union was consummated? It is almost time to start teaching Canadian history.

How much money will Lou Gehrig ask if he breaks Babe Ruth's home run record of 59 this year? Babe gets \$70,000 per annum.

It would appear that good crop years are accompanied by bad hail storms in certain localities.

Join the campaign against weeds. Keep the weeds cut.

BUY CANADIAN MADE GOODS

Russell T. Kelly of Hamilton, Ont., was one of the speakers at the recent convention of Weekly Newspaper men at Bigwin Inn, Muskoka in June. His theme was on Canada and Canadianism. Mr. Kelly who is an advertising specialist and knows whereof he speaks, criticized the lip of patriots who shout "Canada, My Country" and immediately turn and join in sending millions of dollars annually beyond her borders. For instance, the heads of households who buy soap made in New Jersey, received unreserved condemnation because Canadian soups of equal quality and price are available. Seventy per cent of men's hats sold in Canada are made in the States. The States are made in the States. Mr. Kelly can match foreign made goods both in quality and price with Canadian goods in practically every line, and in the course of his inspiring address showed how Canadian people could keep four billion dollars at home every year if they would buy Canadian goods, none of which can be surpassed by American goods in either quality or price. There is much truth in what Mr. Kelly says and Canadians should get the spirit and patronize Canadian industries whenever possible.

THIS IS INTERESTING

Ontario refuses to allow the newspapers to publish advertisements about liquor or beer even though the government sells these commodities in its vendors' stores. The state of Kansas, which last session revoked the prohibition against the sale of cigarettes, refuses to allow cigarette ads to appear in the newspapers. The Great Falls Tribune, reporting a test case in the courts on the matter, says: "Then Kansas legislature, under the pressure of a few long-haired lobbyists last winter passed a law prohibiting the advertising of cigarettes in newspapers published in that state. It was a high-minded effort to keep the boys and girls of Kansas from wanting to smoke 'coffin nails.' Whether or not the law served that purpose we do not know, but it did furnish tobacco dealers with an excuse for charging 25 cents a package for cigarettes. They argued: 'If we can't advertise, our sales volume will be smaller; hence we must charge more.' But Kansas publishers were not satisfied that the would-be detractors of morals had a right, even through legislation, to destroy a legitimate newspaper revenues in this manner, so an appeal was made to the courts. The lower court stood by the reformers, but the higher court took the sensible stand that, inasmuch as the law did not forbid the sale of cigarettes, it could not forbid the advertising of them. Immediately the decision was announced, the price of cigarettes dropped to 15 cents a package."

NOTES AND COMMENTS

Returning from a long night trip by auto, someone remarked that next to the local crossing the greatest source of danger in driving a motor car on the highways can be traced to glaring headlights. Many accidents of a sad nature can be traced to the glaring headlights because some driver could not keep to the road when a glaring light flashed in his eyes. Few if any auto owners want to injure any one else. Their cars are equipped with dimmers but many do not take the trouble to use them. The worst offenders are those who run smaller and cheaper cars. The suggestion is made, that the manufacturers of cars should be compelled to adopt a lens suitable to each make of car and one that will not give offence. The average driver knows nothing about lights, but the manufacturer's business is to know all about them. Why then not make him responsible. If head lights were inspected at the factory it would overcome one of the greatest sources of danger in driving on our highways after nightfall.

Summing up the experiences of his flight from New York to Paris, Commander Byrd thinks Atlantic air liners are only a few years away. They will be multi-motored craft not radically different from the Fokker America. "From an engineering standpoint, the 'cross the ocean' type plane is here," he said. "It will be our task now to make such planes airworthy, as to perfect planes which will not be dependent upon fair weather reports—planes that can start in the face of such weather as the Levathian experiences when she leaves Southampton or New York when her commander knows he is going to encounter storms at sea. Within 10 years passengers will be crossing the ocean in planes as an everyday experience just as they are crossing today in ships."

Speaking of the progress of aviation someone in authority in England predicts that within two decades air transport will be as much a part of civilized life as is the telephone today. After all the airplane is only 23 years old and of recent years our aerial achievements have been truly marvellous. The outstanding feat is that of the two English pilots who, in 1919, managed to fly across the Atlantic from Newfoundland to Ireland. The recent record breaking flights across the Atlantic by Col. Lindbergh and Capt. S. Byrd and Chamberlain demonstrates the efficiency of the present modern engine. It is said that one British airship has been working five years and has flown 382,000 miles. Machines are now in use in Britain, France and Germany capable of carrying 20 passengers with ease and safety.

An interesting story comes from Victoria, B.C., to the effect that Prince George may be the recipient of a ranch at Cobble Hill, Vancouver, Island when he and the Prince of Wales visit there this summer. The proposed presentation has been sponsored by the Associated Boards of Trade of the Island and the government will be asked to vote \$20,000 and other municipalities on the Island \$10,000, the remaining \$40,000 of the \$85,000 will be raised by public subscription. Although the ranch, including machinery and equipment, may be purchased for \$85,000, it is stated that \$265,000 has been expended on it. The project will go before the Government almost immediately.

This is how General John Pershing puts it: "If the Allies had not been able to hold the line for fifteen months while America was getting ready, we might not have been able to get into the war at all—or if we had we would have had to fight it alone." General John J. Pershing, at the Princeton commencement exercises. This is a fair summing up in answer to "Who won the war?"

An Iowa woman has had 69 surgical operations. I hope her health has been restored, but I do not care to meet her and listen to her.—Iowa Paper.

Municipal District of Marquis No. 157.

BY-LAW NO. 24

A By-Law of the Municipal District of Marquis, No. 157, to regulate and govern all person or persons selling goods, wares or merchandise within the bounds of the said Municipality.

The Council of the Municipal District of Marquis, No. 157, enacts as follows: (1). That any person or persons selling goods, wares, or merchandise within the said Municipal District are required to obtain a license for same.

(2). That any person desiring a license, shall make written application to the Secretary Treasurer of the said Municipal District.

(3). That all applications must be accompanied with a fee of \$10.00.

(4). That all licenses granted under the provisions of this By-Law shall be for the year current at the time of issuing thereof, and shall expire on the 31st day of December next succeeding the date of the same.

(5). That any person found guilty of a breach of this By-Law shall upon conviction before a Justice of the Peace, or other Officer having jurisdiction, be liable to the penalty imposed by the By-Law providing for the enforcement of the by-laws of the Municipal District of Marquis, No. 157.

Done and passed in Council assembled at the Lake McGregor Schoolhouse, this 2nd day of July, 1927.

It's the Light-Running Binder

"It's the lightest-running binder ever built". That is the verdict of grain-growers who have used the Light-Running New John Deere.

That easy pull, so much desired, is a quality built into the John Deere at the factory—the result of knowing how.

The Light-Running New John Deere Grain Binder

Eight sets of bearings, roller and ball, self-aligning; also means for thorough and convenient lubrication. Every oil hole is easy to get to; every operating part can be oiled properly to reduce wear and lighten draft.

Great strength; wide suspension-type steel wheels; strong, hot-rolled frame; rigid platform and elevators.

Improved wheel lifts and shifts easily—cannot sag or whip.

Elevators of big capacity; no waste, no clogging. Improved guard and sickle—made like a mower cutter bar. Easy to repair.

Handy bundle carrier. A boy can operate it. Does not scatter bundles. All-steel quick-turn Tongue Truck. Wheels hold to the ground. Relieve horses of side draft and neck weight. Keeps binder running straight. Flexible axle—both wheels conform to uneven ground.

See this binder at our store. Remember, when you buy John Deere implements you are assured of prompt repair service throughout their long life.

PRINCE AND PREMIER

Tour Planned to Provide Holiday for Prince of Wales and Premier Baldwin in Canada

The plans for the tour of the Prince of Wales and Premier Baldwin are being drawn up to provide so far as possible for holidays for the distinguished visitors. It is to be hoped, stated a member of the government, that the public would regard the Prince and the premier as guests of Canada and do everything possible to make the trip a pleasurable one. So far as an official programme can regulate, the various receptions throughout the country are to be brief with the object of allowing as many as possible to see the Prince and Mr. Baldwin, rather than allowing a more limited number to hear public addresses. It was pointed by a cabinet minister who has been active in arranging the visit that Mr. Baldwin is coming to Canada on a holiday trip and while he will speak several times he will endeavor to secure rest and diversion from his own work during the few days he is to be in Canada. In all he will barely be 20 days in the Dominion. As has been previously stated, the royal party and the prime minister's party will separate at Banff. Mr. Baldwin will return east and the Prince and his brother Prince George will go to the E.P. ranch. Once in his own Canadian home, the Prince's visit to Canada in the official sense, is over and His Royal Highness will make his own plans. It is expected that within a few days the official itinerary will be made public.

HORSES FOR RUSSIA

Alberta Supply Many Horses for Shipment to Russia. Horses Not For Cavalry.

That Alberta would be able to supply the balance of the 400 horses to fill the first Russian government order which would be leaving Quebec about July 25, was the confident assertion of Louis Kon, special representative of the Soviet authorities, in the course of an interview. Mr. Kon said that if it had not been for the disrupted negotiations when the severance of relations occurred between Britain and Russia all the horses would have been secured some time ago. As it was quite three weeks was wasted before arrangements were made to carry the contract through, and another factor that had militated against the ready securing of the animals had been the fact that very many ranchers were at the Stampede and had been too busy to round up the type of horses that were required.

"However, I am assured that we will easily get the 400 head in plenty of time," he added, "and this first shipment will go forward from Quebec about July 25. It is the intention to give the horses a little rest at Quebec, before putting them on board the steamer." Mr. Kon said that he was also assured there would be no difficulty in getting the 1,400 head for the second shipment in Alberta. There would be ample time to make the selection before the chartered steamer returned to the Canadian side. The horses for the third shipment, he said, would be secured in British Columbia. There were, he said, about 1,500 head there that could be secured and they were of an exceptionally good type.

THE WHEAT POOL

Second Interim Payment Has Been Made to Wheat Growers

The Second Interim Payment has been mailed to wheat growers by the Alberta Wheat Pool and amounts to fifteen cents a bushel on all grades except No. 6 and feed wheat and mixed grains. The payment on these is ten cents a bushel. The total payment by the Pool to date on 1926 deliveries amounts to \$1.30 per bushel basis 1 Northern in store Vancouver. The final payment will be made in the fall. Announcement is also made that an initial payment of \$1.00 a bushel, basis 1 Northern in store Vancouver, will be made by the Alberta Wheat Pool on the new crop. The Second Interim Payment will mean the releasing of \$5,500,000 to members of the Alberta Wheat Pool. The total paid out by the three Western Pools is over twenty-seven million dollars. Manitoba pays out \$2,696,700 and Saskatchewan \$17,825,000. The Alberta cheques were placed in the mail over the week-end. The distribution of this six and a half million dollars at this time of the year will assist the farmers very considerably with their financing.

CHINCHILLA RABBITS

The adaptability of chinchilla rabbits to the Canadian climate has been amply proven. The cold, dry winters result in the production of a richer, thicker and more valuable fur than can be obtained in milder climates. A bulletin on rabbits distributed by the Publications Branch, Department of Agriculture, Ottawa, gives instructions for the raising of chinchilla and other rabbits and also gives in full the standard for registration of fancy chinchilla rabbits. No rabbit since the days of the Belgian hare boom has created so much stir as has the chinchilla, and with very good reason, as it is one of the most beautiful rabbits in existence with a coat that immediately attracts attention. The feeding and care of these rabbits is not difficult and they are generally very healthy and not subject to any particular disease. In Alberta many farmers are going in for this branch of fur farming which should prove revenue bearing.

ITEMS OF INTEREST

Drumheller's tax rate was set at 70 mills. The rate is arrived at as follows: General town rate 21, town debenture rate 10, school rate 35, provincial supplementary revenue tax 2, municipal hospital tax 3, and public library 1.

A thriving new industry in Southern Alberta, which is making progress and is full of promise, is that of the raising of polo ponies. Three ranches are engaged exclusively in this industry and ranchers and farmers are coming increasingly to engage in it as a side line. About five carloads or one hundred polo ponies leave Southern Alberta annually for the United States.

A despatch from Coutts says: "Numbers of immigrants and scouts looking for land and opportunity are passing through this port, coming from all parts of the United States west and as far as the Texas Panhandle and Southern Arizona. Many of them are headed for the Peace River, drawn by fame of the land which produced the world's champion wheat and oats."

A bulletin is being prepared under the direction of Hon. George Hoadley, Minister of Health, on the subject of summer infections and will be available for distribution shortly. Typhoid and intestinal infections in children are the two troubles which will be chiefly emphasized and attention to both by way of preventive measures is urged upon those particularly who are holidaying during the summer.

Ninety carloads of tar sands will be shipped from McMurray during the present summer, it is announced, to be used in road-making at Jasper Park. The work of surfacing the roads is being supervised by Dr. S.C. Ellis of Ottawa. Shipments are being made at the rate of three or four cars each week and it is expected that some three miles of road in the park will be covered in this way during the season.

The total production of crude naphtha taken from the Royalite well and purchased from other wells in the Turner Valley field during the month of May, 1927, amounted to 22,835 barrels, according to figures published in the July issue of the Metallurgical Bulletin. This total is made up of 18,693 barrels produced by the Royalite No. 4 well, 57 barrels taken from Royalite wells Nos. 1, 2 and 3, and 3,885 barrels purchased from other producing wells.

Progress is being made upon the construction of the new terminal elevator at Calgary, which, according to contract, will be completed by October 1st. It is calculated to give this city a better market for grain in expedited grain movement and cheaper and more abundant elevator feed products. It will have a capacity of 2,000 bushels an hour and be one of the most modern terminal elevators in Canada. Formerly large supplies of screenings have been shipped back to Calgary from points east and west to meet the demands of the Calgary stock yards livestock and milk producers.

A number of enthusiastic mountaineers from Alberta points as well as from other parts of the world gathered at the headquarters of the Alpine Club in Banff for July 19th for the opening of the annual club camp which lasts until August 2nd. The camp this year is located near the source of the Little Yoho stream about eight miles from Takaw Falls, some 7,000 feet above sea level. The feature climbs will include ascents of Mt. President, 10,250 feet; Mt. Vice President, 10,000 feet; Mt. Marpole, 9,200 feet; Mt. McArthur, 9,700 feet and Mount des Poilus, 10,300 feet. There will also be a number of side trips to Twin Falls, Takaw Falls and other beauty spots in the surrounding mountains.

The Wills Act passed by the last session of the Alberta session of the Alberta Legislature has been proclaimed and is now in effect. It provides for three classes of wills which will be considered as valid, namely, those signed and attested in the usual way, holograph wills wholly in the handwriting of the testator with or without witness, and wills of members of the naval, military, air or marine forces. The Act includes a provision that every will shall be revoked by the marriage of the testator except where it is declared in the will that such marriage is contemplated on where the will is made in exercise of a power of appointment and the property thereby appointed would not in default of such appointment pass to the heir.

A commercial traveller sold a merchant of a certain town a bill of goods. The goods arrived and were not up to standard and were returned. The wholesale house attempted to collect the bill and drew a sight draft which was returned. The wholesaler then wrote, and the undersigned is to the financial standing of the merchant and the postmaster replied O.K. An appeal was made to the local attorney to collect the bill and the following reply came to the undersigned: "The undersigned is the merchant on whom you attempted to palm off your worthless goods. The undersigned is manager of the local bank to which you sent your sight draft. The undersigned is the postmaster to whom you wrote, and the undersigned is the lawyer whose services you sought to obtain for your nefarious business. If the undersigned were not also the pastor of the church at this place, he would tell you to go to hell."

The total production of crude naphtha taken from the Royalite and purchased from other wells in Turner Valley during the month of May amounted to 22,835 barrels, according to a report contained in the Metallurgical Bulletin for the month of July. This total is made up by 18,693 barrels produced by the Royalite No. 4 well; 757 barrels taken from Royalite wells Nos. 1, 2 and 3 and 3,885 barrels purchased from other producing wells. This report states that the over-production of oil and the slump in prices in the United States has resulted in the American companies curtailing their activities in the Canadian fields and that a number of operations that had been arranged are to be postponed or abandoned. It is further stated that the release of the Dyer report on the western end of the Cypress Hills section has resulted in the staking of large areas in that locality and that it is reported that many of these filings have been made in the interests of Toronto parties.

SEEKS MORE ALBERTA WELLS

A. M. McQueen of Imperial Oil has been in the Alberta oil fields since the discovery of real crude oil. He does not admit it, but Calgary is convinced that the Imperial is seeking additional acreage, both proved and unproved. It is believed that Imperial Oil has a greater asset in the Devonian well than has been conceded. It is also stated that production could be on a heavier scale in this area. Imperial is believed to be merely proving wells and is not anxious to increase production at this time when there is general over-production.

HENRY FORD WRITES

George W. Cushing of the A.P.A., formerly with the agency then handling the Ford advertising, distributed the following (fac-simile) letter at the 1927 convention in Omaha: "I am glad of the opportunity to send a greeting to the publishers of our home community newspapers. Besides being the oldest and most distinctively American type of publication, the small town and country press is our only real newspaper. It comes to us as a friendly visitor from the neighborhood that we knew and still best. It has avoided the errors of modern journalism without any sacrifice of influence. The Ford Motor Company has always found the country press an efficient means of reaching the public and we foresee further use of its facilities in the future."

YOU SHOULD READ THIS

The following article is from W. T. Macoun, Dominion Horticulturist, on the subject of dividing and transplanting Herbaceous perennials and should be carefully read by those who are interested in flower gardens. September to early October is a good time to lift and divide herbaceous perennials. As soon as the great heat of summer is over and one feels that the soil is not likely to dry out again, the work may be begun. The longer time the plants have to make roots after re-planting the better condition they will be in for blooming next year. The Bearded Irises may be divided and transplanted earlier than most perennials, the month of August being a good time. In re-planting the pieces of iris they should be planted quite shallow, the rhizome or thickened root part being barely covered with soil. If planted deeper they are liable to rot. The top buds of Peonies should not be more than two or three inches below the surface of the soil. Deep planting is one cause of Peonies not blooming well. Small pieces of perennials, if they have a few roots, will soon develop into good size plants if they have good soil condition, so that large clumps may be divided into many plants.

At the burial services of King Ferdinand of Roumania an incident occurred that marked the solemn services. At the supreme moment of interment of the body it was found that the undertaker had not provided ropes to lower the coffin into the grave and the mourners left the side before the body was lowered to its resting place.

KIRKCALDY NEWS

Miss Margaret Roebuck is spending several weeks in Swatzen the guest of Mrs. Young.

Miss Margaret Gardiner spent last week visiting Olive and Freeda Dunbar.

Mrs. Blackburn and daughter Helen of Lethbridge are spending a week in Kirkcaldy the guest of Mrs. Maisey.

Mr. and Mrs. MacIntosh and daughter Beryl left for Blackie where Mr. McIntosh will run the pool elevator.

Mr. and Mrs. Sprunt of Alersyde have moved to Kirkcaldy where Mr. Sprunt will take over the Pool elevator.

The Kirkcaldy Sunday School will have their picnic on Friday, July 29th at the Y. T. Ranch.

BERRYWATER NEWS

On July 6th the ladies of the Buffalo Hill U.F.W.A. entertained members of the Berrywater local at the home of Mrs. R. F. Williams.

Mrs. McBride presided and a very enjoyable program was provided, including vocal and piano solos, a delightful little "Peace Pageant" in various costumes, which was acted by a number of quite small children, and a paper on "War, its causes and consequences" written by Mrs. McBride and read by Mrs. Kemper, was most helpful and interesting. Many old acquaintances were renewed and new ones made during the social hour over the teacups. Many of our members have expressed regret at missing so pleasant an afternoon.

On Wednesday, July 26, the U.F.W.A. met at Berrywater school, after the usual business meeting, a short program was given. Readings by Miss Sinclair and Miss Willa Carr, songs by Miss Adams, after which all adjourned to the playground where races, various games and a baseball game between the "Blues and the Reds" were enjoyed by all the children who were present for this was the local's Children's Day. A peanut scramble caused lots of fun, and prizes were awarded at the conclusion of the afternoon's sports program which was arranged by Miss Base, Miss Adams, Miss Carr and Miss Velma Richardson. There will not be another meeting till towards the end of August.

BLACKIE NEWS

T. McLellan who was operated on for appendicitis in High River hospital, is recovering nicely.

The new elevator being built by United Grain Growers, is now roofed and shingled, and the walls are being metal sheathed.

Alfred Suitor who has been in ill health for the last six months is starting with his father, J. Suitor, for Rochester, Minn., this week.

Public opinion is very strong for the formation of a Parent-Teachers' Association in Blackie, believing that it would be an excellent thing for both to meet and discuss school affairs. Further notice for a meeting in September will be given later.

Mrs. Fairfield and family of four daughters and two sons joined Mr. Fairfield and two sons at Blackie recently and are located in their residence there. They went to Blackie from Barons.

Rev. Harold Cooper, pastor of the Congregational Church at Crete, also of the college, one of America's famous lecturers, visited Mrs. C. G. Bowles and family on his return trip from Alaska. Mr. Cooper has lectured before Kiwanis, Shriners, Lions, Exchange, Civitan, Trojan, Altrurian and various other clubs. Also before colleges and student gatherings. Although only a young man he has journeyed through Europe, India and the Far East, made ten trips across the Atlantic and once around the world. Over four years were spent in India. Leaving Crete on June 20, Rev. Cooper travelled on the C.N.R. to which he gives great praise, going to Skagway and over the "trail of 98" to Karcross, thence to Athin. The traveller remarked that he found no gold, but they found his. At Athin hay was \$130 per ton. Freight alone is \$98 per ton. Returning over the C.P.R. and calling at Banff and Lake Louise and Blackie. Rev. Cooper was accompanied by one of the students from Crete College, Tom Auld, the son of a millionaire. Both left on Saturday for Calgary after which they will start for home, sweet home. While travelling, the ability of Mr. Cooper as a traveller and lecturer was recognized by a fellow traveller who offered him the privilege of conducting a party around the world—travelling first class and all expenses up to \$6,000. Rev. Cooper is considering the honor and privilege offered to him.

Twelve families, twelve married couples and fifty single men have been selected for movement to Alberta from England by ex-Premier Greenfield of this province, and the first arrival of each class have reached the province. Single men have been placed at work upon farms and the families, all with farm experience and with capital ranging from \$800 to \$3,000, are looking over the ground preparatory to buying farms.

ITEMS OF INTEREST

"I wish, I was as religious as Able." "And why?" "He clasps his hands so tight in prayer he can't get them open when the collection box comes around!"

John Casgrain of Ottawa, son of Senator Casgrain is spending the summer months on Senator D. E. Riley's ranch. He is a most enthusiastic on the matter of ranch life and sees a wonderful future for this province.

A large portion of the Calgary Power construction crews were called into service to repair the broken telephone lines near DeWinton and Vulcan. These men will be engaged for another week, after which, they will concentrate on the Vulcan line.

A by-law to appropriate money for the building of a closed-in curling and skating rink has received first and second readings by the town council of Nanton. A vote of the burgesses on the question will be taken on August 8th. The proposed building is to cost around \$10,000.

"Shorty" McLaughlin's horses have been very much in evidence at the Vancouver races and in the money in several races. Jackie Harris is also receiving praise for the capable manner in which he rides his horses. Mr. McLaughlin is at the coast and may return this week.

Harry Lusk of Okotoks and J. C. Wood of Gladys, have been selected by the Fairs Branch of the Dept. of Agriculture, Alberta, to judge all breeds of horses at some of the coming agricultural exhibitions. Mr. Lusk leaves on Monday for the Peace River country and Mr. Wood leaves the same day for the southern part of the province, to be away for about a fortnight.

Visitors from the prairie and across the line complain bitterly about the British Columbia law which compels one to buy a driver's license as soon as he enters this province. Some complaints are also heard that certain police officers are not any too courteous in the manner in which they carry out the disagreeable task of collecting this fee. In the keen competition for tourist business the B.C. government is not helping the province any by the enactment of such silly legislation.—Ferne Free Press

A Russian peasant named Fedor Wassiliev has established a world record in the matter of being a daddy. When he calls "children" 87 offsprings responded. This is how it happened. His first wife presented him with 16 pairs of twins, seven groups of triplets and four sets of quadruplets. That made 69. Then, small wonder, she died and Fedor married again. The second wife kept up the good work and Fedor found himself papa to two more sets of triplets and six pair of twins, thus making a grand total of 87.

A recent survey shows that last year Canadians invested \$560,000,000 in bonds and nearly \$100,000,000 in their savings bank deposits. At the same time they spent \$110,000,000 in the purchase of automobiles. And in the same time their per capita debt losses were only \$3.16, while those of the republic to the south were \$5.60. There we have thrift, free-handedness and safety combined—three attributes of the Canadian people. That is why Canada is progressing and prospering.

The New York Times in an editorial on Britain's recent break with the Soviet comes to the conclusion that Britain, "to speak in the Moscow terminology, has won the battle of China. The English are secure in Shanghai and are returning to the Yangtze interior. The white men invited to leave China are Russians and the invitation comes from their own former Chinese allies. With things rapidly mending in China, from the English point of view, it follows that apprehensions for India and other British colonial interests are mitigated."

Alberta maintains its lead over the other western provinces in the manufacture of brick, tile and other clay products, according to figures compiled by the Development Branch, Canadian Pacific Railway. The value of the clay products manufactured in western Canada, by provinces, in the past two years is given as follows:

Manitoba	\$ 173,794	\$ 242,797
